THE PAR3C METERING MIXING & DISPENSING MACHINE

Based on the industry standard PAR3 machine, the new PAR3C incorporates the latest Meter Mix® Systems in-line drive mechanism (ILD) to provide controlled flow characteristics during dispense not normally associated with pneumatic machines.

ILD also assists the accurate and consistent processing of materials with high mix ratios or vastly differing viscosities.

Incorporating the same proven metering and mixing principles as it's counterpart, the PAR3C provides the perfect solution to many applications.

In addition, the PAR3C can also be automation interfaced for fully or semi-automatic applications.
